

# CAROLINA RETINA INSTITUTE, PC

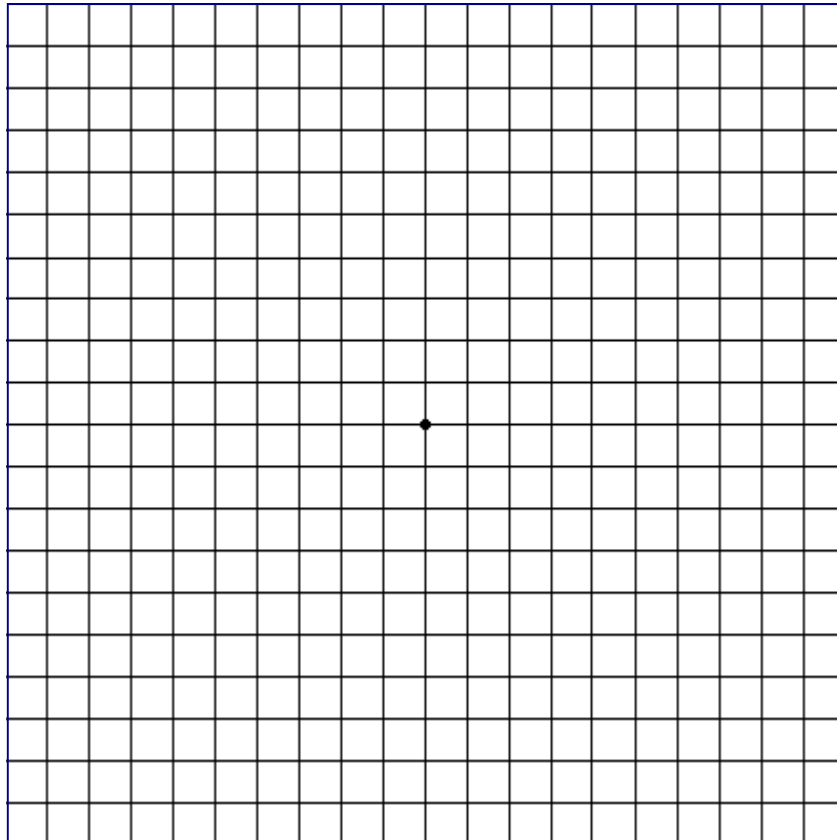

Diseases and Surgery of the Retina, Vitreous, and Macula

*Amit Kumar, MD*

*Board Certified Ophthalmologist*

*Fellowship Trained Vitreoretinal Surgeon*

## AMSLER GRID

- ◆ Test each eye separately. Cover the eye that you are not using
- ◆ Keep the grid at about 14 inches away
- ◆ Look directly at the dot in the center of the grid
- ◆ If you normally wear reading glasses, do so while looking at the grid

If you notice blurry or wavy lines, and dark or blank spots, call your eye doctor immediately
